

## Mission Possible

*“Always use the word impossible with the greatest caution.”*

*—Dr. Wernher von Braun*

The U.S. Space Program is America’s finest example of achieving an impossible dream. Walking on the moon and seeing the surface of MARS are now part of our great legacy because men and women were challenged and inspired to do what others had only dreamed. The U.S. Space & Rocket Center is proud to showcase this story through our museum exhibits. And, through our SPACE CAMP programs, we work to inspire generations of young people to meet tasks boldly, to discover and explore, and to be America’s leaders of the future.

Join our mission. Help us shape America’s future.
